

Completed: June 28, 2005

1. Loose Papers
 - a. Structural analysis of large robotic manipulators
2. Structural Analysis and Design of large robotic manipulators
 - a. Part 1
 - b. Part 2
3. Custom Scheduling Algorithms in a Simulation-Like Environment
 - a. Part 1
 - b. Part 2
4. Thesis - Turnkey CAD-CAM - Ray Charles Biery 1984
 - a. Introduction
 - b. Vendor considerations
 - c. Evaluation sheets
5. Dissertation Defense
 - a. Part 1
 - b. Part 2
 - c. Part 3
6. Dissertation Defense 2
 - a. Part 1
 - b. Part 2
 - c. Part 3
7. Robust Production System Design for Agile Manufacturing
 - a. Part 1
 - b. Part 2
 - c. Part 3
8. Balani
 - a. Strategy for implementing CAD-CAM systems
 - b. Miscellaneous
9. Thesis – Robert W Kimble
 - a. A feasibility study on using voice recognition 1
 - b. A feasibility study on using voice recognition 2
 - c. A feasibility study on using voice recognition 3
 - d. A feasibility study of group technology
10. Thesis – John Jung-Chung Chen
 - a. A feasibility study of the application of comp graphics system
11. Ray
 - a. A structured methodology for the evaluation and selection
12. Thesis – Edwin W. Bradley
 - a. Effects of pre-boot installation
13. Glemser, Ray
 - a. Miscellaneous
 - b. Online information system
 - c. The feasibility of an enhancement of geometric design processor

14. Thesis -- R. Zimmerman
 - a. Application of Statistical Process Control
 - b. The Economic Design of the X-Chart Under Measurement Error
15. Bitronics, Inc. - Final Report
16. Implementation of the "Work in Progress" Module of a Manufacturing Planning and Control System
17. The Enhancement of IBM Solid to Include Geometric Constructions in a Plane
18. Thesis -- Mike DeLeon
 - a. Part 1
 - b. Part 2
19. A Model for Geometric Data Representation and Input from CAD Database for Robot Programming
