

Laboratory Report

Drilling and Countarboring Tests Conducted on Brakeblok Materials
Machinability Study of Experimental Red Mix Versus 551-D Mix
Report on Manufacturing Laboratory investigations to Assist in Improving Metal Cutting Efficiency
Cemented Carbide tool Failure- FPG
Preliminary Study of the Use of Numerical Controlled Machine Tools in the Manufacture of Low Quantity Truck Bloks
Counterbore ABEX
Bill Darrow Bore Project
ABEX Counterbore Study
Result of Drill Evaluation Case 1441
A Suggested Method of Data Collection and Auantitative Analysis to Study Costs of Different Tool Materials
Lenade Forge
Nomenclature and Preliminary Calculations
Manufacturing Systems Research Program with Abex Corporation and IE Department
Laboratory Investigation of Counterbore Design and Performance for Friction Products Group
Thermal analysis of Electrically Heated Platens Used in the Curing of Disc Brake Pads
Spindle Extension Assembly Cracking Problem
PERA Cutfast Machining
Standardized Test Procedure
Abex Testing and General Info
Metal Cuttings
Selecting the right Carbide Tipped Sawbladees
MSRP Personnel

Proposed Plan to Convert Storage Space in Packard Lan 144 to a Useable Work Area for Teaching and Research in Computer-Aided Manufacturing
Cutting Tool Data for Machining of Railroad Wheels
Chamfer on Railroad Trackwork
Disc Brake Presses
Analysis and Proposal of Friction Pad Curing Press Instrumentation
Abex Jobette
Progress Report of Research Center- Elevated Temperature Machining of Austenitic Machinability Mn Steel
Case 1974 FPG Winchester VA
Machining of Fiberized and non-Fiberized Materials
ABB Cleveland Bell Furance Spacer Analysis
ABB Band Saw Tests
Brakeblok Winchester VA April 21 1970
Drilling Characteristics of Powder Metal Compacts
Radiation Curing of Brakeblok Products
Grade Selection of Carbide

Box No 31
